TO WHOMSOEVER IT MAY CONCERN

I write this letter to strongly recommend **Mr. Gokul M**, Integrated M.Tech in Computer Science & Engineering (Hons.) student at Sri Krishna College of Engineering and Technology, Coimbatore, Tamil Nadu, India. Having worked closely with him for **4 months** i.e. 10th February 2026 to 10th June 2026, I can vouch about his technical abilities, research mind-set, and professional maturity in Artificial Intelligence and Machine Learning.

Mr. Gokul demonstrates a rare and practical depth in **LLM and Generative AI engineering**. He has extensively worked on local inference pipelines, hardware-aware model selection, retrieval-augmented generation, and document chunking workflows. His understanding of model runtime behaviour, resource constraints, and operational oversight is well beyond what is typical at his stage. His grasp of **Agentic AI** is equally strong and he designs tool-using systems, multi-step orchestration pipelines, and AI automation workflows with a clear understanding of system-level control.

On the engineering side, Mr. Gokul bridges AI research and production deployment with a maturity that stands out. He is proficient in containerisation, GPU runtime configuration, reverse proxy architecture, service isolation, and secure intranet deployment — skills that translate directly to real-world AI infrastructure roles. These abilities are demonstrated concretely through an internal project (part of his M.Tech thesis as well) where he built full-stack on-premise AI platform.

He is self-directed, thorough in documentation, persistent to solve complex technical challenges, and fully capable across the frontend, backend, infrastructure, and model layers. I fully recommend Mr. Gokul M for competitive AI/ML roles and any advanced research programme where rigorous AI systems thinking are valued. He will be an asset to any team that receives him.

Thanks & Regards,

KNS Pavan Kumar
Scientist 'C', DYSL-SM
